

ALBERTO BARRAGO

Senior Software Engineer

Cagliari, Italy • albertobarrago@gmail.com • (+39) 347 128 46 28

Profile

Senior Software Engineer with 15+ years of experience building enterprise software across frontend, backend and cloud platforms. Experienced in scalable applications, system integrations and CI/CD automation within complex enterprise environments.

Technical Skills

Languages: JavaScript • TypeScript • Python • Java • SQL

Backend: Node.js • Spring Boot • FastAPI • Flask

Frontend: React • Angular

Cloud & DevOps: Azure DevOps • AWS • Docker • Git • CI/CD

Database: MongoDB • Oracle • MySQL

Architecture: REST APIs • Kafka • OAuth2 • Microservices

Experience

SENIOR SOFTWARE ENGINEER

C22 S.R.L. 2025 ~ present

- Led the architecture and delivery of cloud-ready frontend applications, collaborating with backend teams to integrate distributed services and standardize deployment pipelines.
- Mentored junior developers through code reviews, pair programming, and architectural guidance, accelerating onboarding and improving overall team code quality and autonomy.
- Collaborated directly with the CTO to define frontend architectures, technical roadmaps, and actionable delivery plans aligned with business goals.

SENIOR SOFTWARE ENGINEER

MINSAIT/INDRA 2023 ~ 2025

- Architected an Angular component library adopted by 6+ INPS development teams.
- Managed the delivery lifecycle of **11 enterprise products**.
- Designed and delivered reusable enterprise components and integration patterns adopted across multiple teams within INPS.
- Improved CI/CD pipelines and standardized Git workflows.
- Built reusable enterprise components and integration patterns.
- Streamlined DevOps processes, improving release reliability.

SOFTWARE ENGINEER

SOFTFOBIA S.R.L. 2022 ~ 2023

- Led the development of enterprise applications integrating React, Angular and Spring Boot services, collaborating across multiple technology stacks and business domains.
- Optimized application performance resulting in 20% load time reduction, improving user experience and system efficiency.
- Designed and delivered Git/HTTP/JavaScript training for 16 Tech Academy members, improving onboarding time by 20% and facilitating faster integration in development teams.

SOFTWARE ENGINEER

ACCENTURE S.P.A. 2021 ~ 2022

- Designed event-driven integration architectures using Kafka, enabling scalable communication between distributed services and enterprise databases.
- Implemented training programs at Istituto Giua on Git, HTTP, and JavaScript fundamentals for external developers.

SOFTWARE DEVELOPER

SINOSSI S.R.L. 2016 ~ 2021

- Built and maintained production mobile applications using Ionic and Angular for Fortune 500 clients (Deutsche Bank, TIM); managed end-to-end lifecycle from design through deployment, ensuring quality and reliability at scale.
- Progressed from individual contributor to architectural leadership, designing full-stack solutions integrating MongoDB and Oracle databases with Spring Boot backend APIs; established foundational patterns the team adopted.
- Mentored junior developers across frontend and backend domains, building technical depth within the team while delivering on critical client projects.

FREELANCE WEB DEVELOPER

2010 ~ 2016

- Created custom WordPress themes, plugins, and web solutions for startups and small businesses; gained foundational experience in HTML5, CSS3, JavaScript, and emerging frontend frameworks (Backbone.js, Grunt).

Languages

- English: Professional Working Proficiency daily use collaborating with international teams.

Education

- Diploma in Industrial Computer Technician I I.T.C. Pietro Martini, Cagliari
